

"Travel Tips for 2010"

VENUS TRAVEL

By John Conenna

As 2009 comes to a close, the travel industry has been hit hard, with the economical times that have befallen upon us in the last two years, small and large businesses alike have been devastated with the recent economic developments, and the health of people in general. The country of Mexico has been impacted heavily due to the swine flu epidemic and drug cartel that riddled them with a terrible stigma, which will last well beyond the flu epidemic. The Caribbean and the Dominican Republic picked up the slack of people that normally went to Mexico. Cruises became a huge option in 2009, and so did most of Europe with its low fares and great value. Tourism in the United States did very well. Florida and California saw some great benefits as people drove instead of flying.

The year 2010 will be a turn around for our economy. There are many good signs as we close the year here in the final quarter. Travel in general abroad and in the states has started to pick up. There are a number of economical flights one can choose from, while making plans for your business, or family trip. One should choose wisely in their final decision, price does not always mean, all would go well on your trip.

"A Country is not a mere territory; the particular territory is only its foundation. The Country is the idea which rises upon that foundation; it is the sentiment of love, the sense of fellowship which binds together all the sons of that territory." Quote: Giuseppe Mazzini
